Part III DETAILED ACTION

1. Claims 66-68 and 73-74 are pending.
2. The request filed on 11-25-02 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/557,823 is acceptable and a CPA has been established. An action on the CPA follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 66-68 and 73-74 are rejected under 35 U.S.C. § 102(e) as being anticipated by U.S. Patent No. 5,786,168. (AA on the IDS submitted 9-24-02).

The '168 patent teaches determining the amount of SEQ ID NO. 38, which is identical to the claimed SEQ ID NO.5, by using antibody or an antigen binding fragment thereof in an ELISA assay. It is noted the '168 patent teaches the starting material for SEQ ID NO. 38 or was antigen primed T cells isolated from the PBMC of a blood sample from a patient (column 4, lines 57-59 and column 14, lines 56-59), wherein said patient includes autoimmune patients (column 4, lines 18-30). The term comprising in claim 66 opens the claims to include additional steps in performing the immunoassay.

The prior art teachings anticipate the claimed invention.
